강연제목: 의학영상 혁신을 따라 걸어온 길

A Journey Along the Medical Imaging Innovations

Abstract

Medical imaging study is an attractive area where imaging scientists, physicists, engineers, and medical doctors can find their own places and collaborate together. Recent AI revolutions are changing the shape of medical imaging research landscape, and rapid changes are occurring in both clinical practice and imaging science research. Boom of medical AI startups are driving the ever-increasing speed innovations. In this talk, I would like share my personal experiences of medical imaging research over the last decades and a perspective I gained through the journey along the medical imaging innovations. Also I will talk about my recent experiences and challenges with translating academic research works to startup business.
